

Lifeline®

Automated External Defibrillator

Accessories Brochure

Storage & Carry Cases

Keeping your life saving defibrillator in a cabinet at a fixed location ensures that it's presence is noted and that it can be accessed immediately in the event of a cardiac emergency. Our carry cases are designed to hold and protect your defibrillators and any accessories needed.

AED Armor White Metal Indoor Cabinet

Designed with visibility and ease of access in mind. Featuring a large window front so that everyone can see the AED, entry is simple and effective. Specifically designed, it is safe, visible and suitable for wall mounting. Also available with an alarm and/or in green.

AED Armor Perspex Cabinet with Wall Box

High visibility for quick, fuss free retrieval in an emergency. Rescuers can easily open the cabinet and release the defibrillator from its wall box simply by lifting it out of place using the AED's handle. Ideal for office buildings and public places.

Soft AED Carrying Case

This soft-case is made of ballistic nylon and has a carrying handle and highly reflective safety strip. This carrying case is designed to hold a AED, extra set of pads, an extra battery, and other accessories as needed.

AED Armor Mild Steel Cabinet No Lock with Heating

AED Armor's Mild Steel Cabinet No Lock with heating will ensure that your device is always kept at a ready, working temperature, whilst also being easy to retrieve in a cardiac emergency. Also available in Stainless-Steel.

AED Armor Mild Steel Cabinet with Lock & Heating

AED Armor's Mild Steel Cabinet Locked Cabinet will ensure that your device is always kept ready. The cabinet comes with a marine grade stainless steel digital lock to ensure your life saving device is protected from theft and vandalism. Also available in Stainless-Steel.

Hard AED Carry Case

This case is made from tough high-impact ABS plastic. The foam insert is resistant to body fluids, and is specifically designed for the Lifeline AED. Ideal for anywhere your Lifeline AED needs extra protection in harsh environments.

Wall Brackets & Accessories

Looking for a way to store your defibrillator without compromising on style? Designed to be simple, sleek and functional, our wall brackets offer a perfect storage solution. Martek Lifecare also stock a range of additional accessories that any defibrillator user may require.

AED Armor Perspex Wall Box

Designed to be simple, sleek and functional, this large Perspex Wall Box allows you to easily store any defibrillator and its carry case housing vital rescue kits.

Available in 2 sizes available to accommodate all sizes of defibs, their carry cases with rescue kits.

AED Armor Perspex Wall Bracket

Designed to be simple, sleek and functional, the AED Armor Perspex range allows owners to display their life-saving unit with pride, whilst boosting visibility for quick retrieval in an emergency.

AED Armor Metal Perspex Heart Wall Bracket

A bold red heart will be the background to your Perspex wall bracket which will safely house your life-saving AED. Perfect for dynamic and vibrant office spaces, this product will ensure everyone in the area knows where to retrieve the defibrillator in an emergency.

Defibrillator Battery Pack

Battery packs are capable of completing daily, weekly, monthly and quarterly tests. All batteries have a 4 year warranty. A standard battery pack (approx 5 year) is capable of 8 hours of continuous operating. The high use battery pack (approx 7 year) is capable of 16 hours of continuous operating.

CardioSafe CPR Device

CardioSafe helps CPR using the correct technique and ensures the compressions are correct. Manual device, there are no batteries to run down - it is always ready to use. Small, compact, lightweight, and easy-to-use, the CardioSafe is ideal to have with any public access defibrillator.

AED Data Card

Choose from a 6 hour data card for the Lifeline AED/Auto range or a 30 hour data card for the Lifeline View, ECG or Pro range. The data card stores ECG data.

Defibrillation Pads

Martek Lifecare offers both adult and paediatric defibrillation pads. The adult defibrillation pads are for adult use (8 years and older). Our paediatric pads are suited for those younger than 8 years, the energy delivered by the AED is reduced to 50 joules (from 150) and are slightly smaller on the adult DDP-100 pads, accommodating to smaller victims.

Adult Defibrillation Pads

This package contains two pairs of adult defibrillation pads for use with the Lifeline AED/AUTO or Lifeline VIEW/ECG/PRO. To provide a duty of care for a life saving device we only supply pads in packs of two. These pads are for adult use only (8 years or older). Pads should be stored connected to the AED. Extra pads can be stored in the available carrying case. Pad package has a two-year shelf life.

Paediatric Defibrillator Pads

This package contains two pairs of paediatric defibrillation pads. The pads should be stored connected to the AED while extra pads can be stored in the available carrying case. Pad package has a two-year shelf life.

These pads enable Lifeline Defibs to be used with children under the age of 8. They reduce the energy delivered by the AED and are slightly smaller than the adult pads.
